

IMPORTANT! The promoter should provide the exact list of gear that will be provided minimum 2 weeks in advance of the shows.

PA SYSTEM

- The PA system must be of very good quality professional line-array system with subwoofers on a separate line or level controllable.
- It must cover the whole listening area evenly with enough power headroom.
- All the outfill, infill and possible delay cabinets preferably the same brand as the main system
- Please provide a competent and fluent English speaking PA engineer.

PREFERRED SYSTEMS are L'Acoustics, Adamson, D&B or Meyer Sound

- A suitable digital control processing system for the PA used at the venue.
- Must be able to set EQ's, Levels and Delay times individually to PA main Left and Right, Subs (mono or stereo), Outfills and Infills and possible delay cabinets.

FRONT OF HOUSE

- Please provide one of the following consoles with the appropriate digital stage box (in order or preference):

Allen & Heath Drive

Digico SD or Quantum Series

Avid S6L

Yamaha PM or DM series

- Please provide a small active speaker and a talkback microphone at the front of house for communication with the stage.
- Please provide a wireless access point to control the console with a tablet from the stage.
- The audio console for Tarja can not be used by any other party for the entire show day.

MONITORING

- We need 6 wireless in-ear monitor systems and 2 floor wedges.
- The wedges should be 12 inches or bigger. We prefer coaxial monitors from brands such as: L'Acoustics, Adamson, D&B or Meyer Sound
- Please provide one of the following models (in order of preference):

Shure PSM1000

Shure PSM900

Sennheiser G4

- All IEMs must be the same model and same frequency band.
- All IEM antenna outputs should be combined to a single cardioid or helical antenna with an appropriate antenna combiner.
- All wireless gear should be licensed or should fall within the public legal ranges regulated by the local government.
